

# LANDSCAPE ARCHITECTURE STUDIO

Modern European Landscape Design for Timeless Outdoor Living

# ABOUT US

Ogrodnik Wrocławski is a European landscape design studio founded by Małgorzata Idzikowska-Trzeciak. The studio was established in 2018 out of a love for nature, gardening, and landscape architecture. Years of experience, numerous completed projects, and extensive training have contributed to the growth of a recognizable design studio. Today, we specialize in garden design in Wrocław, Lower Silesia, and throughout Poland. And now we have decided that the next step in our development is international collaboration.

Our projects begin with a thorough analysis of needs and starting points, focusing on the user, engineering precision, and artistic vision. Our priority is to combine aesthetics with practical solutions that ensure the garden impresses all year round. Each of our projects is a carefully considered concept designed to create a space for relaxation, inspiration, and connection with nature.

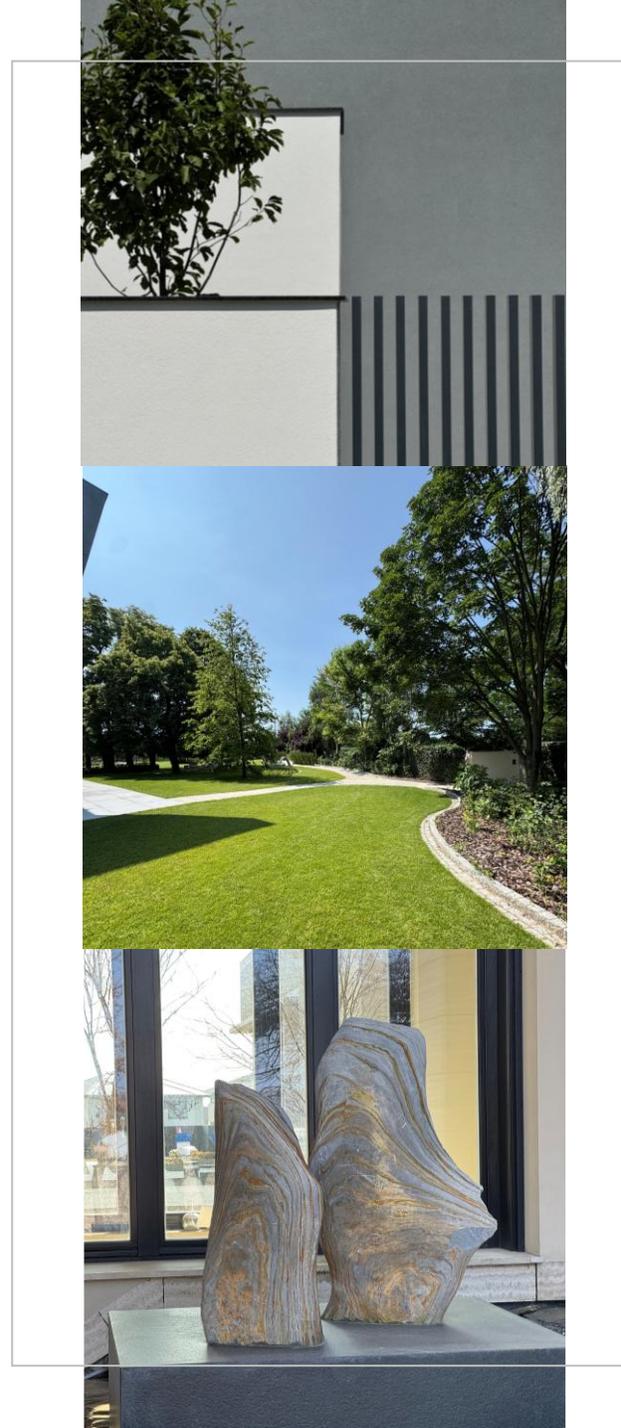

Our specialty is creating high-end gardens and outdoor spaces where architecture blends seamlessly with nature. We combine simplicity with coziness and harmony with wilderness. Each of our projects is a thoughtful concept aimed at creating a space for relaxation, inspiration, and connection with nature.

# WHY CHOOSE US

- ✓ European design approach – modern & timeless
- ✓ Attention to detail & functionality
- ✓ Experience in projects of varying scope and scale

We create garden designs of all sizes. Our studio has developed plans for residential spaces ranging from 40 to 15,000 m<sup>2</sup> (0,3 to 5 ac.). We also design green areas surrounding commercial properties. As part of our work, we provide fencing and façade design services.

At our studio, we don't just design gardens - we bring them to life. By overseeing each project from concept to completion, we gain hands-on experience and deep technical insight. This ensures that every design we create is not only visionary and meticulously detailed but also fully realizable. Our ideas consistently transform into beautifully executed gardens.

# SERVICES

## Concept Design

unique, ready-to-implement landscape concepts tailored to the property.

## 3D Visualizations

realistic renders to help clients see the final effect.

## Technical Drawings

precise plans for contractors, ensuring smooth execution.

## Remote Collaboration

we work internationally, providing complete documentation and support for your projects.

# PORTFOLIO

More on our websites /click/

Let's design inspiring outdoor spaces together.

We would be happy to collaborate with U.S. landscape architects, developers, and clients seeking unique garden design solutions.
